

EDUCATION AND SCHOLASTIC ACHIEVEMENTS				
Program		Institute	% / CGPA	Year
Dual Degree in Aerospace Engineering		Indian Institute of Technology, Madras	8.23/10	2027*
Class XII (HSC)		Pace Junior Science College, Mumbai	90.33%	2022
Class X (ICSE)		St. Mary's School ICSE, Mumbai	98.16%	2020
- Secured an All-India Rank of 4647 (top 2.5%), among 1.6 lakh+ candidates at the Joint Entrance Examination - Advanced in 2022 - Secured a Percentile of 98.86 (top 1.14%), among 1.6 lakh+ candidates who appeared for the Joint Entrance Examination - Main in 2022 - Secured National Rank 5 among top 23 national teams at Inter IIT Tech Meet 13.0 by designing a Dream11 product using ML-driven engineering. - Secured National 3rd Place (of 100+ competing teams) at SAEINDIA AeroTHON 2023 by architecting an autonomous search-and-rescue UAV. - Secured 3rd Place at Product Construct by engineering an end-to-end motor licensing business model to Honda Motor Company. - Ranked #1 in Asia and #4 Globally at European Hyperloop Week 2025, securing 1st Place in Socio-Economic and 2nd Place in Technical Research.				
Olympiads	Global Rank 51 in IEO'21 (SOF ¹)	State Rank 20 in IIO '21 (SZO ²)	State Rank 36 in IEOL '21 (SZO ²)	State Rank 55 in IOS '21 (SZO ²)
SKILLS AND LANGUAGES				
Advanced Excel		Python, C++, SQL, MATLAB	OpenCV, TensorFlow/Keras, YOLOv8	
Pandas, NumPy, SciPy & Scikit-Learn		PowerBI, LaTeX, Git	SQL, MongoDB, JavaScript, TypeScript	
COURSEWORK				
Finance & Quantitative Modeling for Analysts (UPenn ³)		Construction Economics and Finance (CE6030)	Business Analytics (OB2502)	
Finance and Accounting for Engineers (MS3610)		Machine Learning Specialization (Stanford Online)	Data Structures & Algorithms (OB2202)	
PROJECTS AND RESEARCH				
Quantitative Investment Analysis – Energy Infrastructure (Prof. Nikhil Bugalia)	Stochastic Valuation & Monte Carlo Risk Modeling for a ₹1,148 Cr Renewable Energy Project			
	- Architected a 20-year structured project finance model for a ₹1,148 Cr asset, accelerated tax-shield arbitrage, and stringent DSCR norms to normalize yield (MIRR) against corporate equity hurdle rates. - Engineered a stochastic Monte Carlo risk engine (10k iterations, Python/NumPy) to map multi-variable volatility across CAPEX, OPEX, and WACC vectors, isolating P5 tail-risk (VaR) and proving a <0.1% probability of loss.			
Implied Volatility Quantitative Predictive Modelling GoQuant Mini Project	Deployed deep learning on market microstructure data to extract predictive signals for high-frequency algorithmic trading			
	- Worked on a high-frequency LSTM neural network to forecast 10-second forward implied volatility, processing large-scale tick data to achieve a competitive 71% RMPSE on the GoQuant⁴ Kaggle leaderboard. - Engineered alpha-generating predictive features by extracting multi-dimensional signals from OHLCV trends, L2 order book depth, and cross-asset correlations to optimize short-term market-making accuracy for Blockchain.			
Derivatives Valuation Engine and Risk Screener Independent Research	Designed a predictive analytics platform to capture opportunities within the NSE Option Chain			
	- Engineered Black-Scholes pricing engine and automated screener via Python, processing live NSE data to compute theoretical premiums, Greeks, and isolate statistical arbitrage with >7% market-to-model deviations. - Built robust sensitivity analysis models to stress-test asset valuations against market shocks, utilizing dynamic PnL heatmaps to evaluate downside risk under fluctuating spot prices and implied volatility.			
Modern Portfolio Theory Capital Allocation Model Independent Research	Employed the Markowitz model using covariance matrices to mathematically maximize risk-adjusted capital returns			
	Studied a risk-adjusted asset allocation model using Modern Portfolio Theory, analyzing multi-year historical correlation matrices across 10 asset classes to optimize capital efficiency and overall portfolio variance.			
PROFESSIONAL EXPERIENCE				
Honeywell India	Incoming intern slated to work within the Data Analytics unit, focusing on software and systems integration.			
Kapil Rayon (India) Data Science Intern (Jun '24 – Jul '24)	Deployed ML forecasting models and optimized manufacturing pipelines to boost production throughput			
	Architected a digitized workflows for legacy manufacturing, developing an XGBoost sales-forecasting model to optimize inventory and deploying standardized machine procedures to increase production throughput by 15%.			
Swadesh (YC-S19) Founder's Office Intern (Aug '23 – Oct '23)	Scaled US growth initiatives and engineered supply-chain dashboards, driving revenue and saving INR 20L			
	Directed global user acquisition and full-stack development, securing \$20K in partnerships across 60+ US universities while engineering a centralized supply-chain dashboard reducing annual overhead by INR 20L.			
FundL Ventures Investment Trainee (Sep '23 – Nov '23)	Executed comprehensive quantitative and fundamental due diligence on 10+ Clean-Tech and Deep-Tech ventures, evaluating scalability and value propositions to facilitate deal-flow for international VC funds.			
Doorl Co-Founder (Feb '23 – Nov '23)	Conceptualized a team management solutions application by identifying key growth opportunities via 100+ surveys, featuring AI-powered scheduling using Google APIs, optimizing daily workflow efficiency.			
POSITIONS OF RESPONSIBILITY				
Avishkar Hyperloop Team Member (Aug '24 – Aug '25)	- Directed financial operations and corporate relations for India's premier student-led Hyperloop initiative (backed by Indian Railways), overseeing a ₹8Cr budget and optimizing supply-chain/procurement workflows. - Helped propel the team to rank #1 in Asia and #4 Globally at European Hyperloop Week 2025, securing 1st place in Socio-Economic Research by presenting comprehensive commercial feasibility models and evaluations.			
	- Directed financial strategy and large-scale event operations for the IITM E-Summit, managing an INR 85L+ budget, driving 20k+ footfall, and leading a 12-member team to scale startup ecosystems across 7 cities. - Facilitated exclusive institutional deal-flow by conceptualizing a Pan-India pitch event ("Elevate") and a novel VC-founder matchmaking portal, facilitating engagements between 12 VC firms and 60+ startups. - Drove commercial revenue of INR 6L+ by spearheading Southern India's largest Startup Expo (100+ startups), alongside co-developing a talent-acquisition portal connecting 80+ startups to fulfill 300+ hiring positions.			
EXTRA-CURRICULARS				
Sports	- Selected in a team of the best 20 Tennis Players amongst thousands at the NSO⁵ 2022 selections at IIT Madras. - Secured the Gold Medal for the Ganga Cycling Team at the inter hostel Dean's Trophy race. Semi Finalist at the Sub Junior Mumbai Schools Sports Association (U-14) Table Tennis Tournament.			
Unsung Crackers Education-for-All	Mentored 50+ underprivileged Class X students in Java and Python, leading to 85%+ board exam success, as part of an inclusive education initiative for remote students.
